

The Environment Group

The St John's Environment Group is open to anyone belonging to the family of St John's who would like to get more involved in caring for the environment, or would even simply like to learn about the environmental issues facing us today, especially here in South Africa.

The aim of the group is to make everyone aware of our call as Christians to care for all of God's creation. To this end we have various activities which include organising environmentally themed services, recycling, introducing and encouraging more energy efficient use of electricity, tree planting, hosting information stands at sustainable living exhibitions, and assisting with both regional and diocesan environment workshops, amongst others. Due to a number of these activities, we are proud to be certified as an Eco Congregation by the South African Faith Communities Environmental Institute (SAFCEI).

Apart from specific activities we meet together about once a month on a Thursday afternoon and gladly welcome anyone and everyone to join us.
